

## kiosk.link®

- Self Serve Kiosk Technology
- Free reception from long group fitness lines
- Customised timers allow for booking control
- Stop multi attendance & free ticketing
- Integration with RFID technology
- Instant communication to database

## Self Serve Kiosk

Do you ever think to yourself, "if we didn't have huge lines at reception waiting to book into a group fitness class, the reception would be a lot quieter?" Your members are most likely as frustrated as you are! Kiosk.link allows users to collect their class tickets in their own time, avoiding long lines at reception upon their arrival.

## Complete control

Don't be concerned that you will lose control of your class numbers by using kiosk.link. The software knows what time to open a class for bookings, and when to close the class so that patrons have time to get to the class. Membership type restrictions allow you to control who attends which classes avoiding free access to classes they are not financial for. Once a booking is made at the kiosk the database is updated immediately allowing your reception staff to still issue tickets if required.

## Save your staff costs & keep member's happy

The sums have been done. With kiosk.link you could eliminate a staff member from your reception either allowing them to complete other tasks or save the money completely. We believe the kiosk will pay itself off in approximately three months (depending on module purchased), allowing any money after to be solely profit.

*"The purchase of kiosk.link was a non negotiable for us. Once we did the sums, it was clear that kiosk.link was the perfect answer to save staff costs and add a great service feature to our facility"*
