- Efficient Transaction Processing
- Customisable Touch screen setup
- Integration with RFID technology
- Customer visitation
- Group Fitness Check in
- User Security
- Quick Links to important screens
- Cash on Card
- Integrates with QAS address validation software

Efficient Transaction Processing

Don't waste time at reception having to press lots of buttons to just process a casual visit. Pos.link enables you to set up your point of sale layouts to suit your business with the ability to change the setup whenever you like without ongoing repercussions. Staff can utilise the unlimited touch screen setup to save time on every transaction.

Integration with RFID technology

The RFID technology embedded with the links software works with pos.link to allow customers to purchase goods via the cash they have placed on their RFID membership card. This allows customers to be able to purchase goods at anytime, whether it be at POS, Kiosks or Vending machines, without the need to carry their wallet when training.

Group Fitness Check in

Too much time is spent by too many businesses counting the attendance to their group fitness classes. Why waste that time when the group fitness features in pos.link can do it all for you. Customers can choose the classes they wish to attend, pre book and collect a class ticket upon arrival. Timer controls allow centres to place restrictions on booking rules, allowing greater access to their members.
