Classweb.link

Take the pressure off staff and allow parents to book online. Classweb.link allows new and existing customers to search for suitable classes in the privacy of their own home, allowing them to work out what classes will suit them best. Bookings are made in real time and no chance of overbooking is possible. Users can complete registration details and pay online, avoiding the time involved to complete forms on site.

As the database owner you control what the customers can do online. You may want them to view class options online and then contact the facility to book, they may be able to book into some of your classes, or you can open it up to allow booking to any class.

Facilityweb.link

We all know that as our days get busier and busier, we often lack time to make important appointments and bookings. Now your members can book their health consultation or PT appointment online, or even book and pay for a squash court. Facilityweb.link allows you to control which facilities are available for booking online, and to customise your prices. Casual booking prices are often higher than member prices, and facilityweb.link knows how to handle that automatically.

Secure transactions

All payment transactions are secure online transactions and complies with Internet security standards. Your members can be comfortable knowing that you are providing a secure and safe facility to make their lives easier. Transactions are processed into your database immediately allowing you to know each day, how much is being collected online. Cleared funds are transferred to your nominated account as soon as available.
